

Platform stairlift T3000

for indoor and
outdoor use

Versatile lift makes homes or public environments accessible

Pushchairs, wheelchairs, cleaning equipment or goods deliveries? Landings in the home, outdoors or in public environments no longer need to be an obstacle. T3000 is a new generation of stair lifts from Cibes Lift, which with its vast experience can guarantee reliable operation and high safety. Its smart design means the lift takes up very little space in confined areas. In the folded position the lift only extends 237 millimetres from the wall. The platform and safety barriers fold up and down automatically. When the lift is not in use the platform is folded up against the wall and the stairs are free to use.

Sensitive, accessible and easy-to-understand pushbuttons.

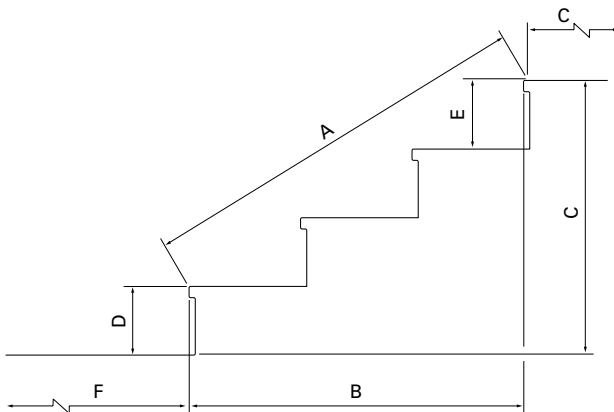

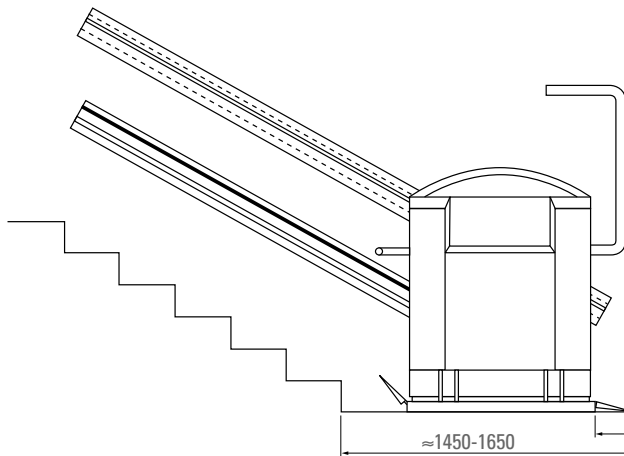

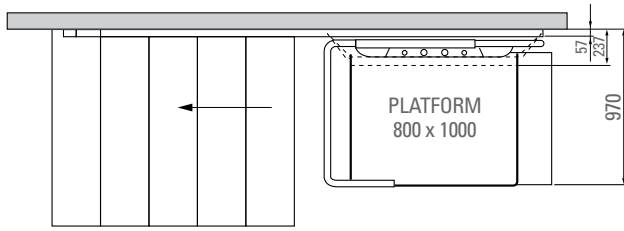

The lift is equipped with a firm handrail, non-slip floor, carrier arms and sensitive edges to provide the highest possible safety. The lift has easily accessible parts to make it easy to use for both sitting and standing users. A service friendly design and ingenious mounting system for pillars or wall mounting make lift assembly simple and safe.

Example of options:

- Angled access
- Folded seat
- Single phase operation with soft-start and stop

Advantages T3000:

- Versatile – can be fitted on either the left or right of the stairs.
- Modern design.
- No visible motor or electrical parts.
- Only extends 237 mm from the wall when folded up.
- Can be folded up manually in the event of a power failure.
- Easily moved if relocated.
- Excellent safety – in addition to conforming to applicable standards the lift is type approved by SAQ.
- Versions for both indoor and outdoor use.
- Suitable for stair inclines between 15-45 degrees.

TECHNICAL DATA:

Max. load	225 kg
Speed	0.15 m/s (max.)
Drive	Rack and pinion
Motor	Worm gear motor with brake
Fall protection	Speed governor and safety gear
Platform	Width 800 mm, length 1000 mm
Connection	3-phase 400V/240V, 10A. 1-phase connection as an option
Control voltage	24V
Control system	Control unit on the platform and key switches on both landings
Safety	The lift is type approved by SAQ
Mounting system	The distance from the wall to the rail is 57 mm. Only 237 mm with the platform folded up
